

## IT Infrastructure Solutions

## Process & Project Management

## Custom Software Development

### About Us:

Pumex Computing, LLC is a small business that has a track record of delivering on time and within budget, 100% of the time. Our core philosophy is based on five principles that dictate how we conduct business and interact with our clients:

- **Strong Communication**  
Pumex focuses on keeping the lines of communication open during every engagement, so expectations are met and our client's stay informed.
- **Fast Response Time & White Glove Customer Service**  
All projects start and end with the customer experience; which is why all of our clients receive the highest levels of service and lightning fast response times
- **High Quality Products & Services**  
It goes without saying that when you engage with an IT company, you expect superior technical knowledge and skills. Pumex believes this should be a given and provides top tier resources/project management.
- **Long Term Business Relationships**  
Long term relationships are the cornerstone upon which our mutual success is built. We build lasting relationships based on trust, communication, and bringing value to our clients.
- **Self-Examination & Receptiveness to Customer Feedback**  
It is our promise to our clients to be open to criticism and feedback, never settle for status quo, and practice the art of self-examination; to always better our best.
